RF Cables Technical Data Sheet

PE-P141HF-BULK

Configuration

- Flexible Cable
- 2 Shield(s)

Description

Pasternack's PE-P141HF is a flexible, high frequency coaxial cable that provides similar loss characteristics to semi-rigid cable and low VSWR of 1.3:1 maximum up to 31 GHz. The low loss coax cable features silver-plated conductors and dual shields to maintain a shielding effectiveness of 110 dB. The size of the conductors for this low VSWR coax was specifically chosen to allow termination with standard connectors designed for M17/130-RG402 and other M17/130 cables. The outer shield is coated with a tough, chemical and heat resistant jacket. This PE-P141HF flexible low loss coaxial cable is a great choice for short length, high frequency system hook-up or jumper cable applications. The Pasternack coax cable can also be used as a replacement option for bent semi-rigid cable assemblies when length and routing are considered.
