Description

PE-P141 high performance coax assemblies are cost effective designs, ideal for production test environments where rugged flexible cable assemblies are required. This series includes 26.5 GHz stainless steel SMA male connectors with a thick wall outer conductor designed to extend the life of the cable assemblies. A heavy-duty boot provides improved strain relief and adds to the durability of the cable assemblies. 18 GHz stainless steel type N male connectors with hex/knurl coupling nuts are also available. These cable assemblies are built using double-shielded flexible cable providing excellent shielding greater than 100 dB. All PE-P141 test cables are 100% continuity, Hi-Pot, and RF tested to the published specifications. Custom lengths are built to order and shipped the same day.
