

Push-On SMA Male to SMA Female Adapter

RF Adapters Technical Data Sheet

PE91336

Configuration

- Push-On SMA Male Connector 1
- SMA Female Connector 2
- 50 Ohm
- Straight Body Geometry

Features

- Max VSWR of 1.5:1 up to 18 GHz
- Gold Plated Beryllium Copper Contact

Applications

- General Purpose Test

Description

Pasternack's PE91336 push-on SMA male to SMA female adapter is part of our full line of RF components available for same-day shipping. The SMA connector mates mechanically with commercially available 3.5mm and 2.92mm (K) connectors. Our SMA to SMA adapter has a male to female gender configuration built of durable stainless steel. PE91336 SMA male to SMA female adapter operates to 18 GHz. The Pasternack RF adapter provides good VSWR of 1.5:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
